

Beyond Compliance: Preparing for **GDPR** in a Data-Driven World

Organizations have already taken the next leap in their digital transformation journey by imbibing Next-Gen technologies. This has led to a flourish of significant amount of data streams, hence it is essential that all organisations immediately start preparing for the implementation of GDPR by carrying out a “review and enhance” analysis of all current or envisaged processing in line with GDPR.

At Hitachi Systems Micro Clinic, we will ensure that you have adequate procedures in place to deal with the enhanced transparency, accountability and individuals' rights provisions, as well as master your shift towards governance and manage data protection as a corporate issue.

The GDPR imposes a wide range of requirements on organizations that collect or process personal data, including a requirement to comply with five key principles:

GDPR: Key Data Privacy Security Processes to Deploy

Preview

- Processes
- Profiles
- Data sensitivity
- Risks

Secure

- Encryption
- Pseudonymization
- Anonymization
- Fine grained Access Control
- Separation of duties

Trace

- Auditing
- Activity monitoring
- Alerting
- Reporting

HISYS-MC Compliance Framework

Foundation

Stakeholder Awareness

Ensure key stakeholders are fully aware of the GDPR and the impact it will have on the organisation

Readiness Assessment

Conduct a readiness assessment to understand how near or far away the organisation is from relevant new requirements

Data inventories and mapping

Compile an inventory of the personal data collected, who it is shared with and what controls govern its use

Governance

Use the GDPR to assess the holistic approach to privacy-how is data protection governed, and what are the associated roles and responsibilities?

Remediation

Legal and compliance

Determine how compliance will be demonstrated, review approaches to capturing consent, and re-draft privacy notices

Strong focal point for

1. Chief Risk Officer
2. Chief Compliance officer
3. General Counsel

Strong focal point for

1. Chief Information Officer
2. Chief Information Security Officer

Technology

Deploy technology and processes to bring about a Privacy By Design culture

Data

Ensure the organisation has the right data governance practices to respond efficiently to the new rights afforded to individuals

Strong focal point for

1. Chief Data Officer
2. Chief Operating Officer
